Hi John,

## Non-privileged Emails.txt

I remember know. I think Curtis misunderstood what I tried to explain to him.

what I said was if DL/ID has card statuses and if card statuses is not removed(null remove date) then list them out as below. But if DL/ID has card statuses and if card statuses is removed(non null remove date) then don't list card statuses.

I think Curtis misunderstood what I said and he exclude DL/ID that has card statuses with card statuses is not removed(null remove date).

```
-          DL card status
01          ;PURGED;
03          ;REVOKED SEX OFFENDER;
04          ;VOLUNTARY SURRENDER;
05          ;VOLUNTARY SURRENDER CSO;
06          ;DENIED TEXAS LIMB WAIVER;

Hi John,

Sorry so long ago I don't recall why. But I think at final meeting we decided not to exclude records with deleted flag(DPS\_PERSON.DPSP\_DEL\_FLAG = 0, 1)', admin status = reported deceased (ADMIN\_STATUS.ADST\_ADMIN\_STATUS = REPORTED DECEASE(08)) and DL /ID with Card Statuses and remove date is null

Only exclude records that are alias or special. Unfortunately the final query excludes dl/id with card statuses having non null remove date. The other agreed upon parameters were implemented correctly.

Subject: Data Dictionary on EIC Data Extraction.

John,

Here is the layout of the files being produced, along with the lengths of each field. As you can see there are number of fields/columns which need crossref information. Some of that crossref information is in the database like the (county table, country table, etc.) which I can extract and send along with this data but there are other values which I'm not sure where this crossref data is stored so I will need to get with Anhtuan to discuss. More to come on this layout.

John,

Here is the layout of the files being produced, along with the lengths of each field. As you can see there are number of fields/columns which need crossref information. Some of that crossref information is in the database like the (county table, country table, etc.) which I can extract and send along with this data but there are other values which I'm not sure where this crossref data is stored so I will need to get with Anhtuan to discuss. More to come on this layout.

DL Stored Data FILE Format

---

- a. DL/ID/UNL = CHAR (13)
- b. Person ID = CHAR (17)
- c. First Name = CHAR (40)
- d. Last Name = CHAR (40)
- e. Middle Name = CHAR(40)
- f. Suffix = CHAR( 2)
- g. Date of Birth = CHAR (10) Format MM/DD/YYYY
- h. Social Security Number = CHAR(9)
- i. Permanent Street Address 1 = CHAR (35)
- j. Permanent Street Address 2 = CHAR (35)
- k. Permanent City = CHAR(35)
- l. Permanent State = CHAR(2) '
- m. Permanent Zip Code = CHAR (5)
- n. Permanent Zip Code Ext.= CHAR(4)'
- o. Permanent County = CHAR(3) -- Number value in this column will need to be cross-referenced to the County Data file also provided.
- p. Permanent Country = CHAR(3) - value in this column will need to be cross-referenced to the Country Data File also provided.
- q. Mailing Street Address 1 = CHAR(35)
- r. Mailing Street Address 2 = CHAR(35)
- s. Mailing City = CHAR(35)
- t. Mailing State = CHAR(2)
- u. Mailing Zip Code = CHAR(5)
- v. Mailing Zip Code Ext. = CHAR(4)
- w. Mailing County = CHAR(3) Number value in this column will need to be

Non-privileged Emails.txt

cross-referenced to the County Data file also provided.

x. Mailing Country = CHAR(2) Value in this column will need to be cross-referenced to the Country Data File also provided.

y. Sex = CHAR(1) - values in the field will be either an ('F' for female or 'M' for Male, 'U' (unknown))

z. Race = CHAR(1) - values in this field will be (A(asian), B(black), H(hispanic), I, O, W(white)) ???

aa. Disabled Veteran = CHAR(1) - values in this field represent (0,1) - 1 represent Disable Vet.

bb. Homebound = CHAR(1) - values in this field represent (0,1) - 1 represent Homebound

cc. AKA Name

cc1: AKA\_FIRST\_NAME = CHAR(40)

cc2: AKA\_LAST\_NAME = CHAR(40)

cc3: AKA\_MIDDLE\_NAME = CHAR(40)

dd. AKA DL/ID Number = CHAR(25)

ee. Card Status = CHAR(2) - CROSSREF ??? values are (01, 03, 04, 05, 06, 07, 08, 09, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20)

ff. Record Status = CHAR(1) - CROSSREF ??? values are (1,2, 3)

gg. Card Type = CHAR(1) - CROSSREF value (1,2,3,4) ???

hh. Surrendered DL/ID Number = CHAR(25)

ii. License Surrendered ??? - Need to get with Anhtuan to find out where this data resides.

jj. License Confiscated --- DL does not store this data

kk. DL Issuance Status = CHAR(1) - Need crossref on this data will get with ANHTUAN??? Values (1,2,3,4,5,6)

ll. ID Issuance Status = CHAR(1) - Need crossref on this data will get with ANHTUAN??? Values (1,2,3,4,5,6)

mm. License Status - No Data provided same as values in Issuance Status.

nn. Deceased Certificate Number = CHAR(10)

DL Election Identification Certificate Data File Format

a: First\_Name CHAR(40)

b: Last\_Name CHAR(40)

c: Middle\_Name CHAR(40)

Non-privileged Emails.txt

d: Suffix\_NAME CHAR(2)  
e: Physical\_Addr\_1 CHAR(40)  
f: Physical\_Addr\_2 CHAR(40)  
g: Physical\_City CHAR(35)  
h: Physical\_State CHAR(2)  
i: Physical\_County CHAR(3)  
j: Physical\_ZIP Char(5)  
k: Physical\_ZIP\_EXT CHAR(4)  
l: Physical\_Country Char(2)  
m: Mail\_Addr\_1 CHAR(40)  
n: Mail\_Addr\_2 CHAR(40)  
o: Mail\_City CHAR(35)  
p: Mail\_State CHAR(2)  
q: Mail\_Country CHAR(2)  
r: Mail\_Zip CHAR(4)  
s: Mail\_Zip\_Ext Char(5)  
t: DOB Char 10 - Format MM/DD/YYYY  
u: Social\_Security\_Nbr CHAR(9)  
v: Race CHAR(1)  
w: Sex CHAR(1)  
x: Issue\_Date CHAR(10) Format MM/DD/YYYY
